Paul,

Oswald's notebook (Vol. 16 p.50) has an entry,

Mrs. Hal Davison

4047 Tuxedo Rd.

Atlanta, Georgia

Mother of U.S. Embassy Doctor

following this but apparently meant as part of the entry is Russian script translated as 'Natalia Alekseevna'

Synopsis of CD 409 (Atlanta) reads in part as follows:

"Dr. Alexi S. Davison formerly located at American Embassy, Moscow, USSR, stated examined attractive Russian female with two children a few months ago and woman was emigrating to U.S. He also conversed with woman's husband and gave address of his mother in Atlanta. He could not definitely state these people were the OSWALDS".

Several interesting things about this. The Doctors given name. Possibility of his having interesting connections in view of his previous employment. "a few months ago" isn't a very concise description of what must have been at least 18-20 months. And, the attractive Russian female had two children. Marina & LIO had one until Oct. '63.

I would be interested in having anyones further thoughts on this. Maybe it should be researched further?
